### **CITY OF DUBLIN TO ACQUIRE AUTOMATED GIS-BASED TRAFFIC COLLISION TRACKING SYSTEM**

**DUBLIN, Calif., November 5, 2013** – The City of Dublin has been awarded a grant from the California Office of Traffic Safety (OTS) to acquire a system to electronically track, analyze, graph, and report traffic collision records. The objectives of the \$32,380 grant include: identifying locations with high collision rates and identifying improvements; enabling City staff to correlate collisions with components such as roadway design, signal timing, visibility, traffic volumes, weather conditions, and other relevant factors; and improve data sharing between traffic engineering staff and Dublin Police Services.

Funding for this system is provided by a grant from the California Office of Traffic Safety, through the National Highway Traffic Safety Administration.
